Hobby Site

Project Brief

The aim of this project is to create a personal website on a topic of your choosing. The site can be on any topic of your choosing (Hobby, family, interest).

Your Project

The web page should be created using HTML and CSS, you may also choose to use bootstrap for the site layout and additional elements. The Site should include:

1. A Home page that introduces the site.
2. A minimum of three additional pages.
3. A consistent navigation structure for all pages of the site.
4. A coherent design for all the pages of the site.
5. CSS styling and / or layout stored in external stylesheets
6. Pictures that have appropriate alt text.

Deliverables

The address for the GitHub repository.
The address for the GitHub pages.

Extension

Add a user input form to one of your pages.
Include some HTML elements we have not covered in the sessions.
Use some Bootstrap components (e.g. jumbotron, cards or carousel).
Create a second site using CSS Grid.
